SPRUHA THAWARE

Project Manager – UI/UX

Mumbai, India • +91 88057 41944 • spruhaathaware@gmail.com • linkedin.com/in/spruhathaware • spruhathaware.github.io

PROFESSIONAL SUMMARY

UI/UX Project Manager with 5+ years of experience, including 3+ years leading design and digital product delivery for enterprise banking clients. Delivers 95% of projects on time and within budget by running Agile workflows, stage-wise design QA and structured designer–developer handoffs. Known for turning client requirements into clear plans, managing risks across parallel workstreams, and keeping design intent intact through release.

CORE SKILLS

Project Management: Agile/Scrum delivery, sprint planning, project scheduling, scope & requirements management, risk management, resource planning, budget tracking, status reporting

Stakeholder Management: Client communication, stakeholder updates, cross-functional team leadership, vendor management

Design Delivery: Design QA, design–developer handoff, UAT & build validation, wireframing, prototyping, user journey mapping

Tools: Jira, Notion, ClickUp, Figma, Cassini, Atlas, Swanly Roadmaps, Google Analytics, Claude Cowork

PROFESSIONAL EXPERIENCE

Project Manager – UI/UX | Canvs, Mumbai — **Jun 2024 – Present**

- Lead end-to-end delivery of UI/UX projects for enterprise banking mobile and web products, achieving **95% on-time, within-budget delivery** and a **90%+ project success rate**.
- Rolled out Agile workflows and Notion-based trackers that made project execution **20% faster**.
- Cut design-to-development turnaround by **25%** by introducing structured handoffs and UAT build validation against Figma specifications.
- Improved design consistency and usability by **30%** through stage-wise design QA at every project stage.
- Manage client requirements and stakeholder updates across parallel workstreams, and identify and mitigate delivery risks early.
- Built Claude AI workflows that automate daily PM routines: a weekday morning brief, tagged-mention digests, a Figma feedback dashboard and a client context hub.

Project Manager | Archstore, Mumbai — **May 2023 – Feb 2024**

- Defined project scope, goals and deliverables with stakeholders, and built and ran project plans across design, development and client teams.
- Coordinated cross-functional teams and facilitated designer–developer collaboration to ensure accurate design implementation.
- Tracked delivery in Jira, Swanly Roadmaps, OKR Board and Atlas, and set up Google Analytics and Tag Manager tracking.
- Ran product demonstrations for prospective clients and managed end-to-end vendor onboarding and relationships.

Project Manager (Internship) | Pinchforth, Boston — **Jun 2022 – Oct 2022**

- Translated client requirements into weekly plans and monitored progress against timelines.
- Ran design quality checks for usability and consistency, working closely with designers and developers.

Senior Catalogue Executive | FirstCry.com, Pune — **Dec 2020 – Apr 2022**

- Supervised the catalogue team and ran quality checks on every product before publication.
- Managed stock allocation with suppliers and warehouses; reviewed system processes to improve quality control and site performance.

Earlier: Digital Marketing Intern, Buzo Media Services, Nagpur (Aug–Sep 2020) • Marketing Intern, Tays Global, Pune (Jun–Jul 2019)

SELECTED PROJECTS

- **Throughline – Design-to-Delivery Workspace (ongoing, built with Claude Cowork):** Building a PM workspace that turns Gmail, Figma, Notion and Drive into an action inbox, Design and Engineering homes, and reports with team and client views.
- **RideSlot – Monthly Ride Pass (design thinking):** Took a monthly cab and auto pass from a user interview to a 19-screen Figma prototype, with night-before driver confirmation, a guaranteed backup driver and a test plan for 11 users.
- **Finger Faith – Party Game (built with Claude):** Owned scope, content and launch of a live one-phone party game for 4–8 players: 376 cards across 12 types and 5 heat levels, fair-pick and scoring rules, and a shareable results screen.
- **UTS Mobile App – Ticket Booking Redesign:** Redesigned the railway ticket booking journey from 8 steps to 5 (37% fewer steps).
- **Design–Developer Collaboration Framework:** Introduced a 4-step build validation and design QA workflow that caught UI issues earlier and reduced design–development back-and-forth.
